# Kabasura Kudineer

Kabasura Kudineer or Kashayam is a classical preparation of decoction in Siddha used in the treatment of respiratory illness. Viral infections attack your respiratory system and bring down your immunity through symptoms like fever, nasal congestion, sputum, sore throat, watering in eyes, headaches and body pain. This traditional form of health treatment in India proved to comfort the patients and aid them in speedy recovery.

- Helps to treat cold and body shivering
- Provides effective remedy to range of fevers
- Controls cough and nasal congestion
- Relieves body pain and fatigue
- Soothes irritation and watering in the eyes

# Nilavembu Kudineer

Nilavembu is a green plant and is native to India. This plant comprises an active constituent known as Andrographolide. It is an “immunomodulant” molecule. The reason behind Nilavembu being a potent Siddha medicine against fever is because of this element. The herbal plant, Nilavembu, exerts antipyretic property. Antipyretic medicine reduces fever or inflammation

- Provides effective remedy to range of fevers
- Helps in boosting immunity
- Removes the fatigueness
- Relieves body pain, headache and energy loss
- Reduces the toxins present in the body
